CAREER OBJECTIVE

Entry level Software Developer and Integrated M.Tech (CSE) student. Looking for a fresher role to apply strong solving skills, programming knowledge, and a continuous learning mindset in a professional software development environment.

EDUCATION

Noida Institute of Engineering Technology <i>Master of Integrated Technology in Computer Science and Engineering</i> Courses: Operating Systems, Data Structures, Analysis of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases	Greater Noida, UP 2022–2027
Ramjas School RKP <i>Senior Secondary Education</i>	RK Puram, Delhi 2020–2021
Chinmaya Vidyalaya <i>Secondary Education</i>	Vasant Vihar, Delhi 2018–2019

EXPERIENCE

Codec <i>Java Development Intern</i> - Developed projects using object oriented and SDLC principles improving modularity - Implemented Swing and GUI logic to handle fover 20+ user scenarios real time. - Enhanced input handling and control flow logic, reducing latency by 25%.	Remote Aug 2025 – Sep 2025
InternPe <i>Python Development Intern</i> - Created code to solve real world problem using modular and documented code. - Applied data processing and control flow to improve accuracy and runtime by 20%. - Debugged errors and optimized Python scripts, improving execution and reliability.	Remote Oct 2024 – Nov 2024

PROJECTS

E-Waste Management Website - Designed a responsive web platform to streamline e-waste disposal and pickup workflows, reducing manual coordination by approximately 40%. - Executed direct routing to refurbishment centers to eliminate intermediaries and improve process transparency. - Enhanced usability by developing reusable UI components and optimizing navigation flow by 30%. - Tech Stack and Version Control: HTML, CSS, JavaScript, Git GitHub: github.com/Ady-OZz/EWMS	Jan 2025
Student Admission System - Designed a Java Swing–based admission management system for student and administrative operations. - Enforced secure authentication using MD5 hashing and role-based access control. - Enabled real-time record retrieval and updates using JDBC and MySQL, improving administrative efficiency. - Tech Stack and Version Control: Java, Swing, JDBC, MySQL, Git GitHub: github.com/Ady-OZz/StudentAdmission	Aug 2025
Budget Tracker Application - Built a dynamic web application to track expenses and manage budgets with real time balance updates. - Automated expense calculations and summaries using JavaScript DOM manipulation, eliminating manual tracking. - Improved usability through interactive UI elements for adding, editing, and deleting expenses. - Tech Stack and Version Control: HTML, CSS, JavaScript, Git GitHub: github.com/Ady-OZz/Expense-Tracker	Oct 2024

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS
Tools: Kubernetes, Docker, GIT, PostgreSQL,Liinux
Libraries: Pandas, NumPy, Matplotlib

PUBLICATIONS

Research Paper: Currently preparing a research manuscript titled “Web Based E Waste Management System”.
Technical Book: Co authoring “Deep Learning on Web Applications”, proposed for Packt Publishing.

HONORS AND AWARDS

Achieved Runner’s Up position at the FinTech Hackathon held at IIIT Delhi in August 2024.
Participated in the Facebook Developers Circle Hackathon in August 2023.

CERTIFICATIONS

Spring Boot – DevOps Tools and Capstone Project: Infosys Springboard	2025
Java Programming Certification: Coursera	2025
